HEALTH DOX

The Paradox of Health State Futures

- Future European health politics and policies
- Impact of health reforms on health inequalities, health expenditures, and public attitudes towards both the health system and the welfare state
- Health inequalities
- The meaning of the welfare state for individuals

- Capacity building
- Stakeholders
- Collaboration with other projects in the programme

The most expensive per capita & the highest
% HC from GDP

HC cheap and not very important

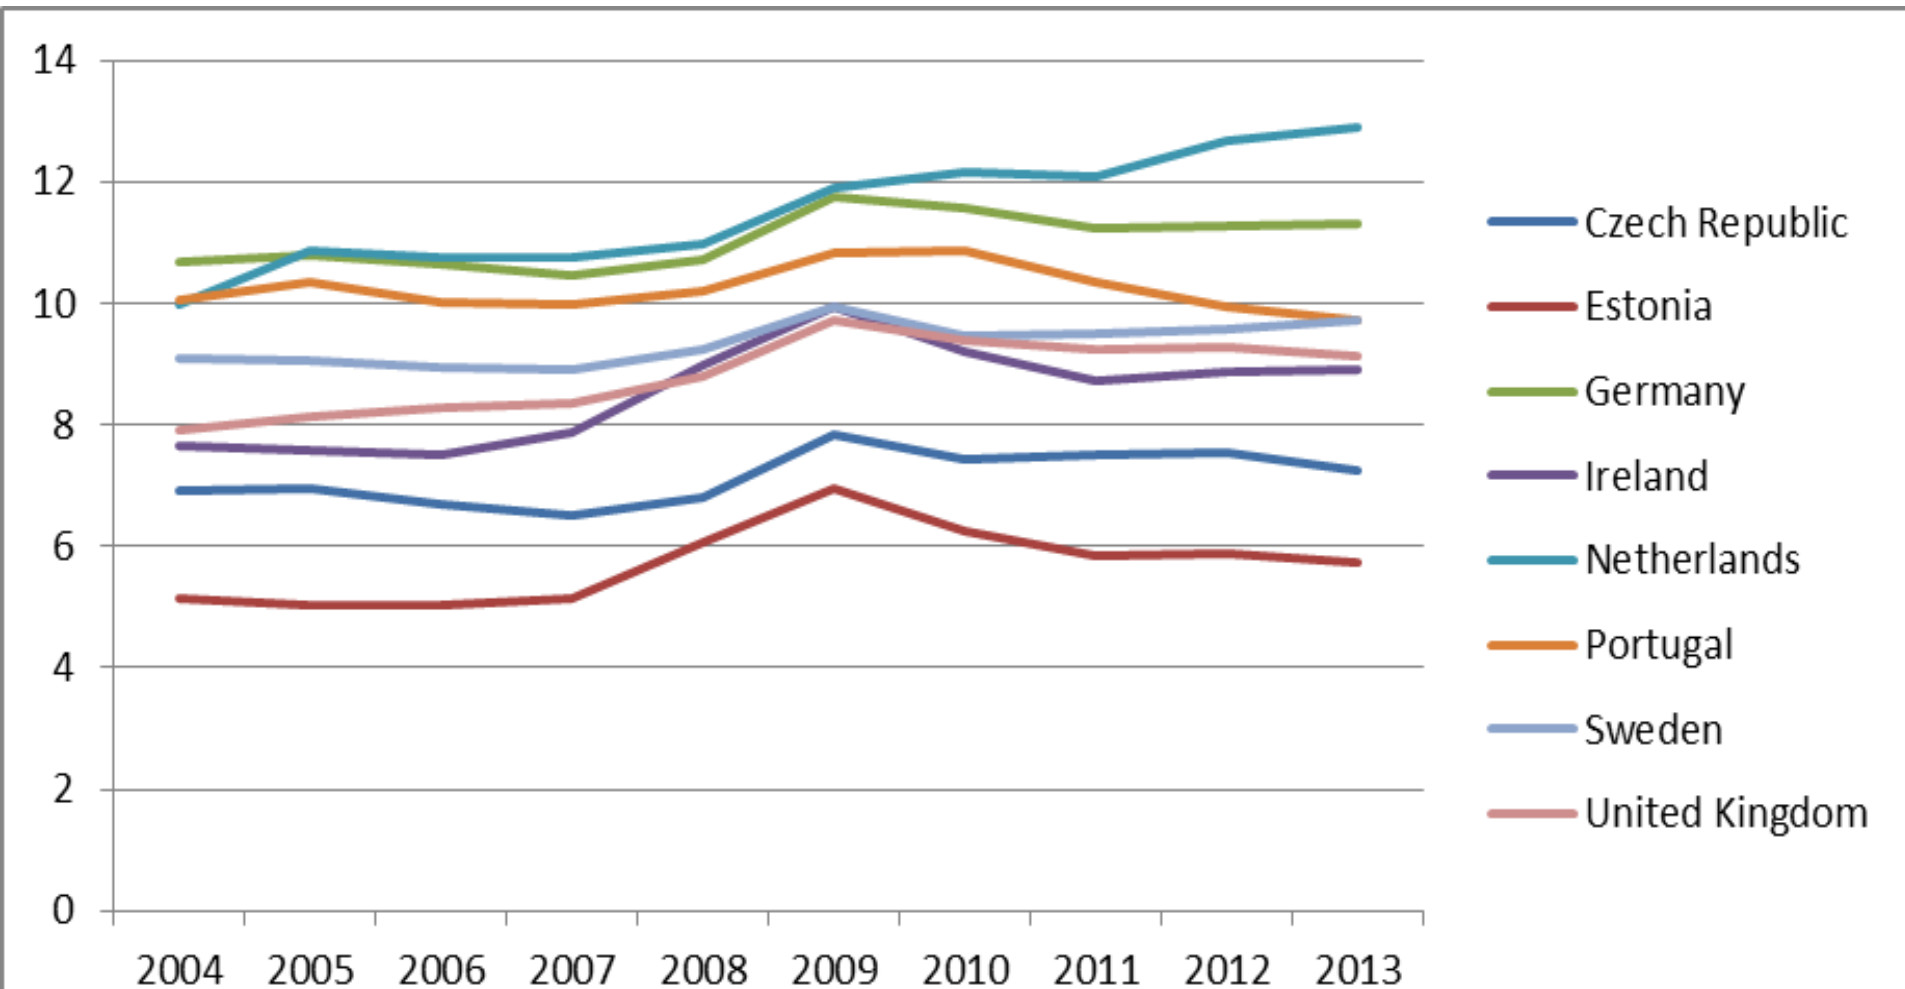

% of GDP high,
expensive per capita

HC cheap, but important

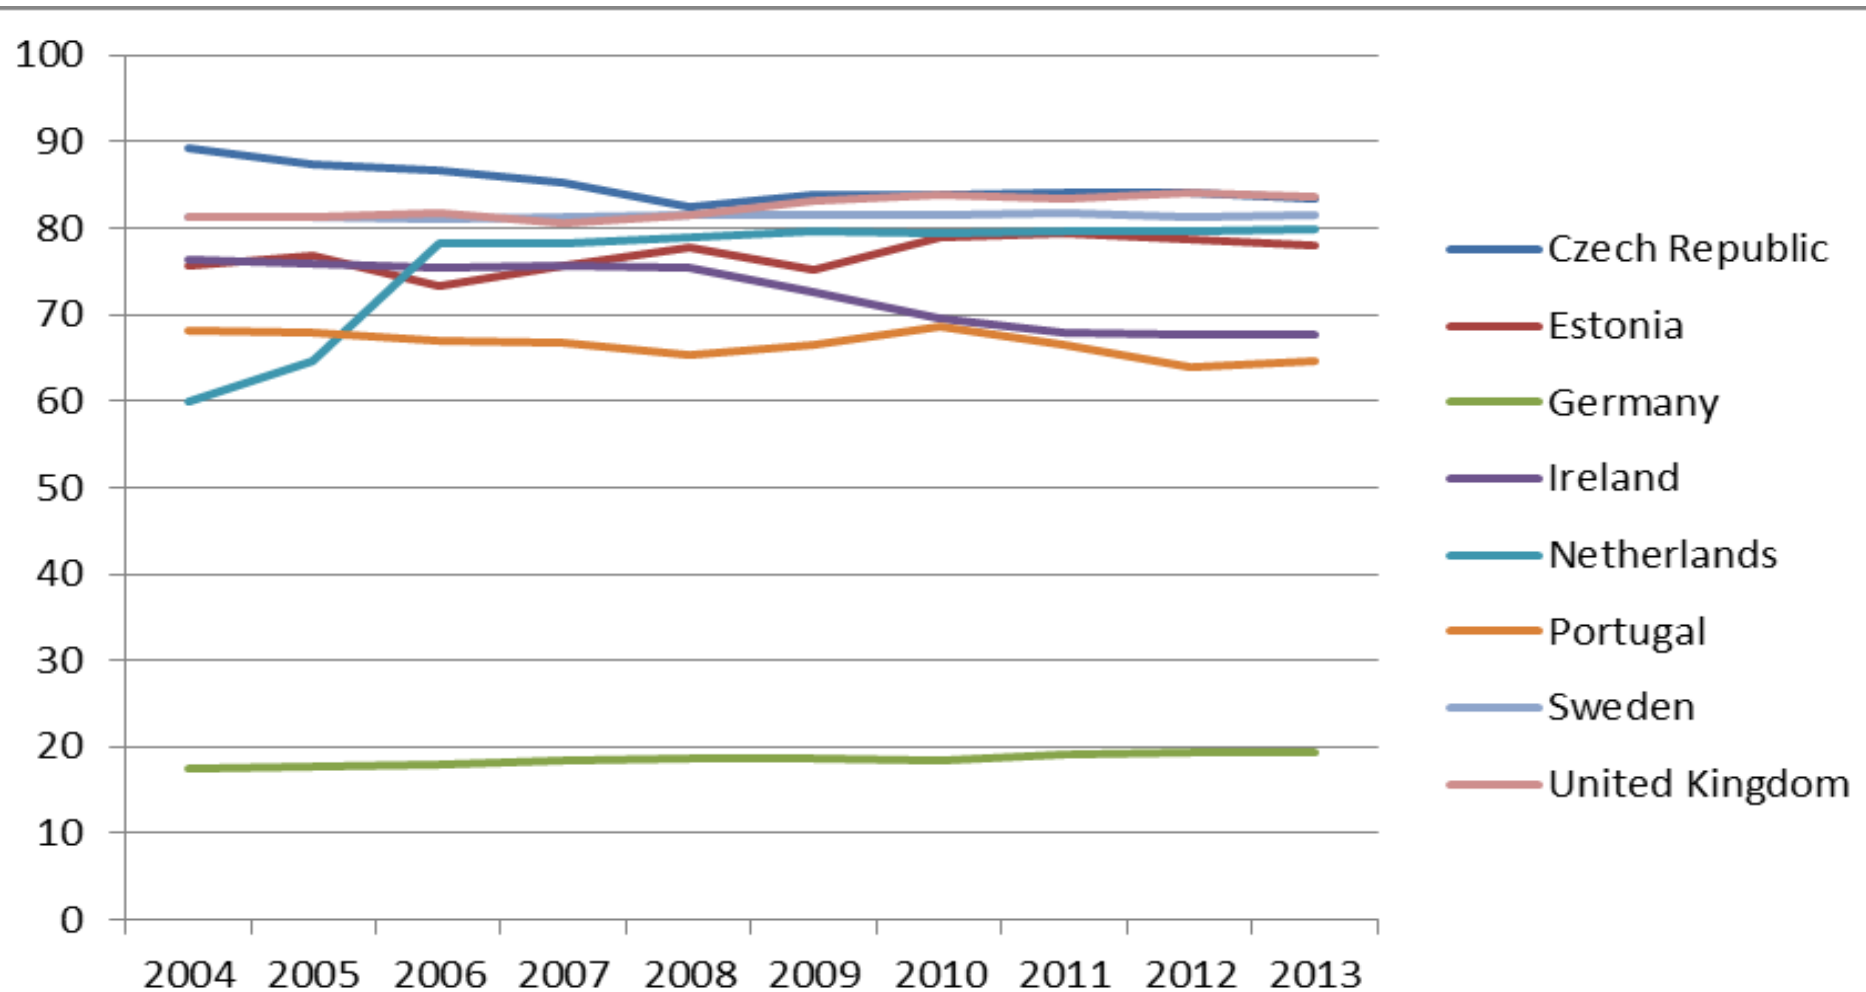

Not so important, but costly.

Total Health Expenditure % Gross Domestic Product

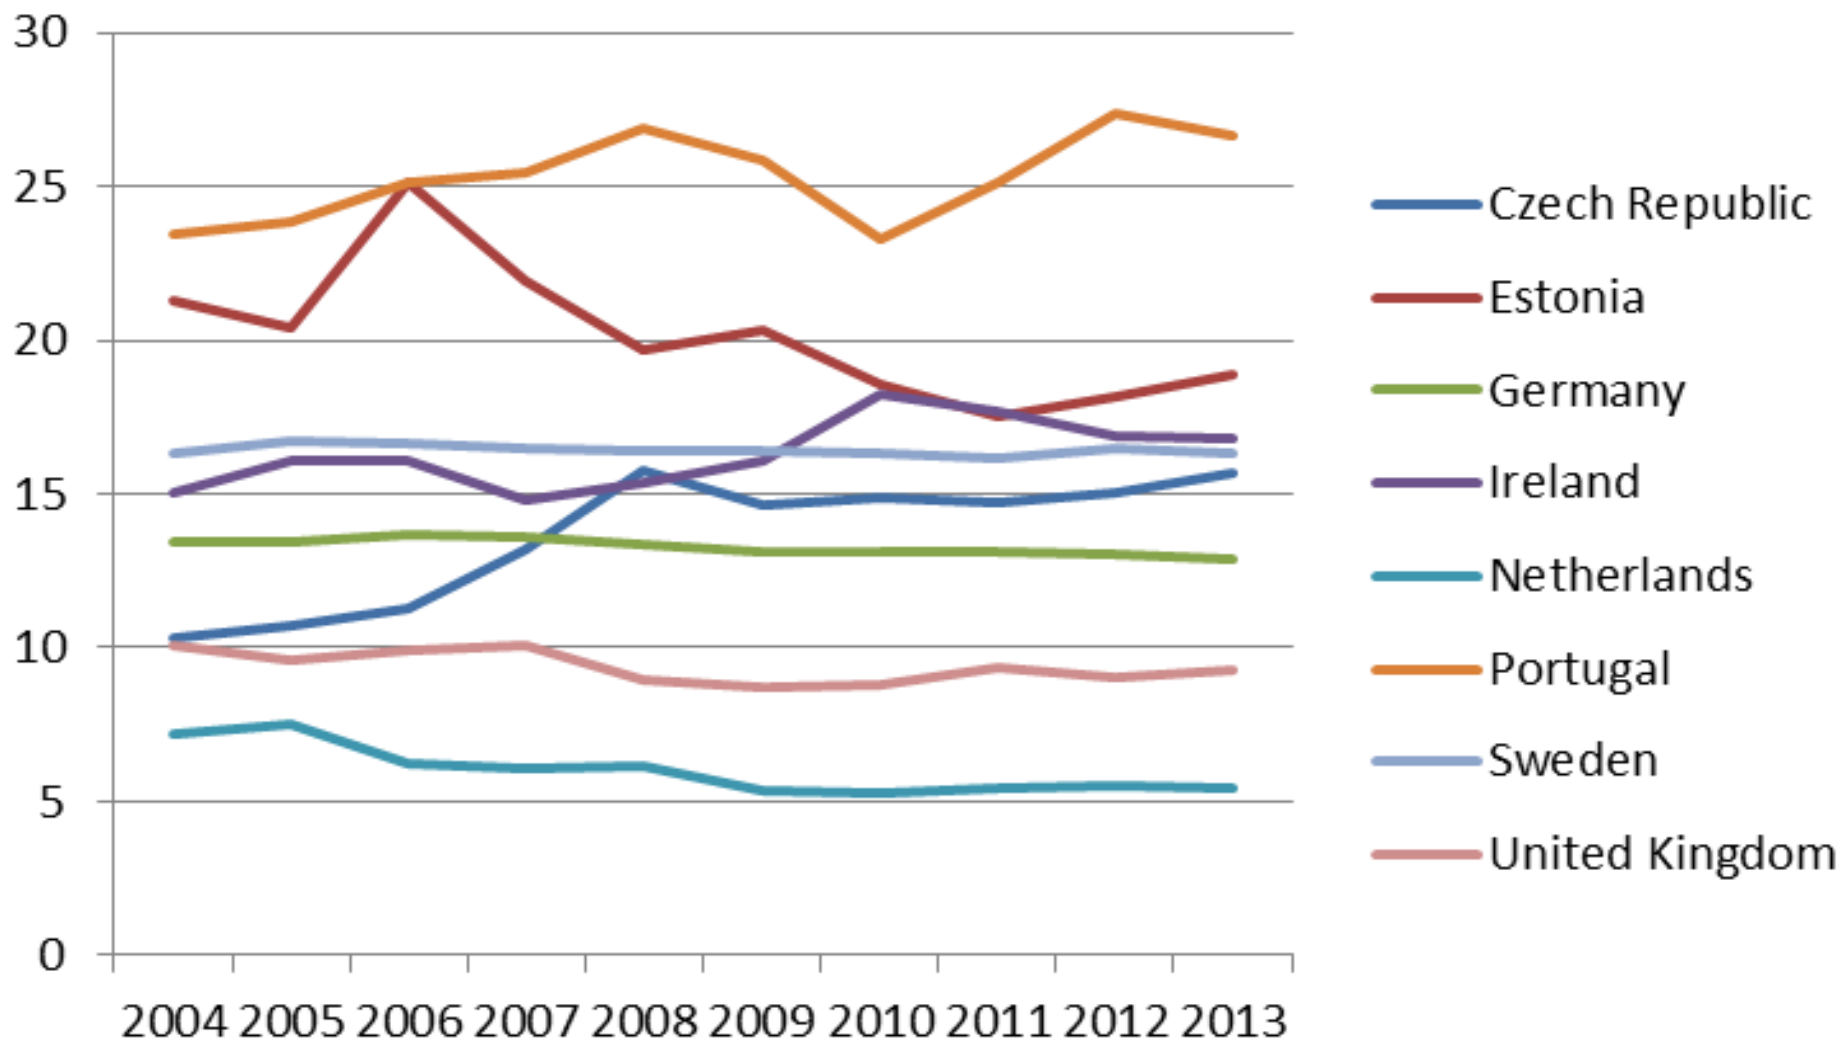

(GDP) - WHO

Government Health Expenditure as % of Total Health Expenditure WHO

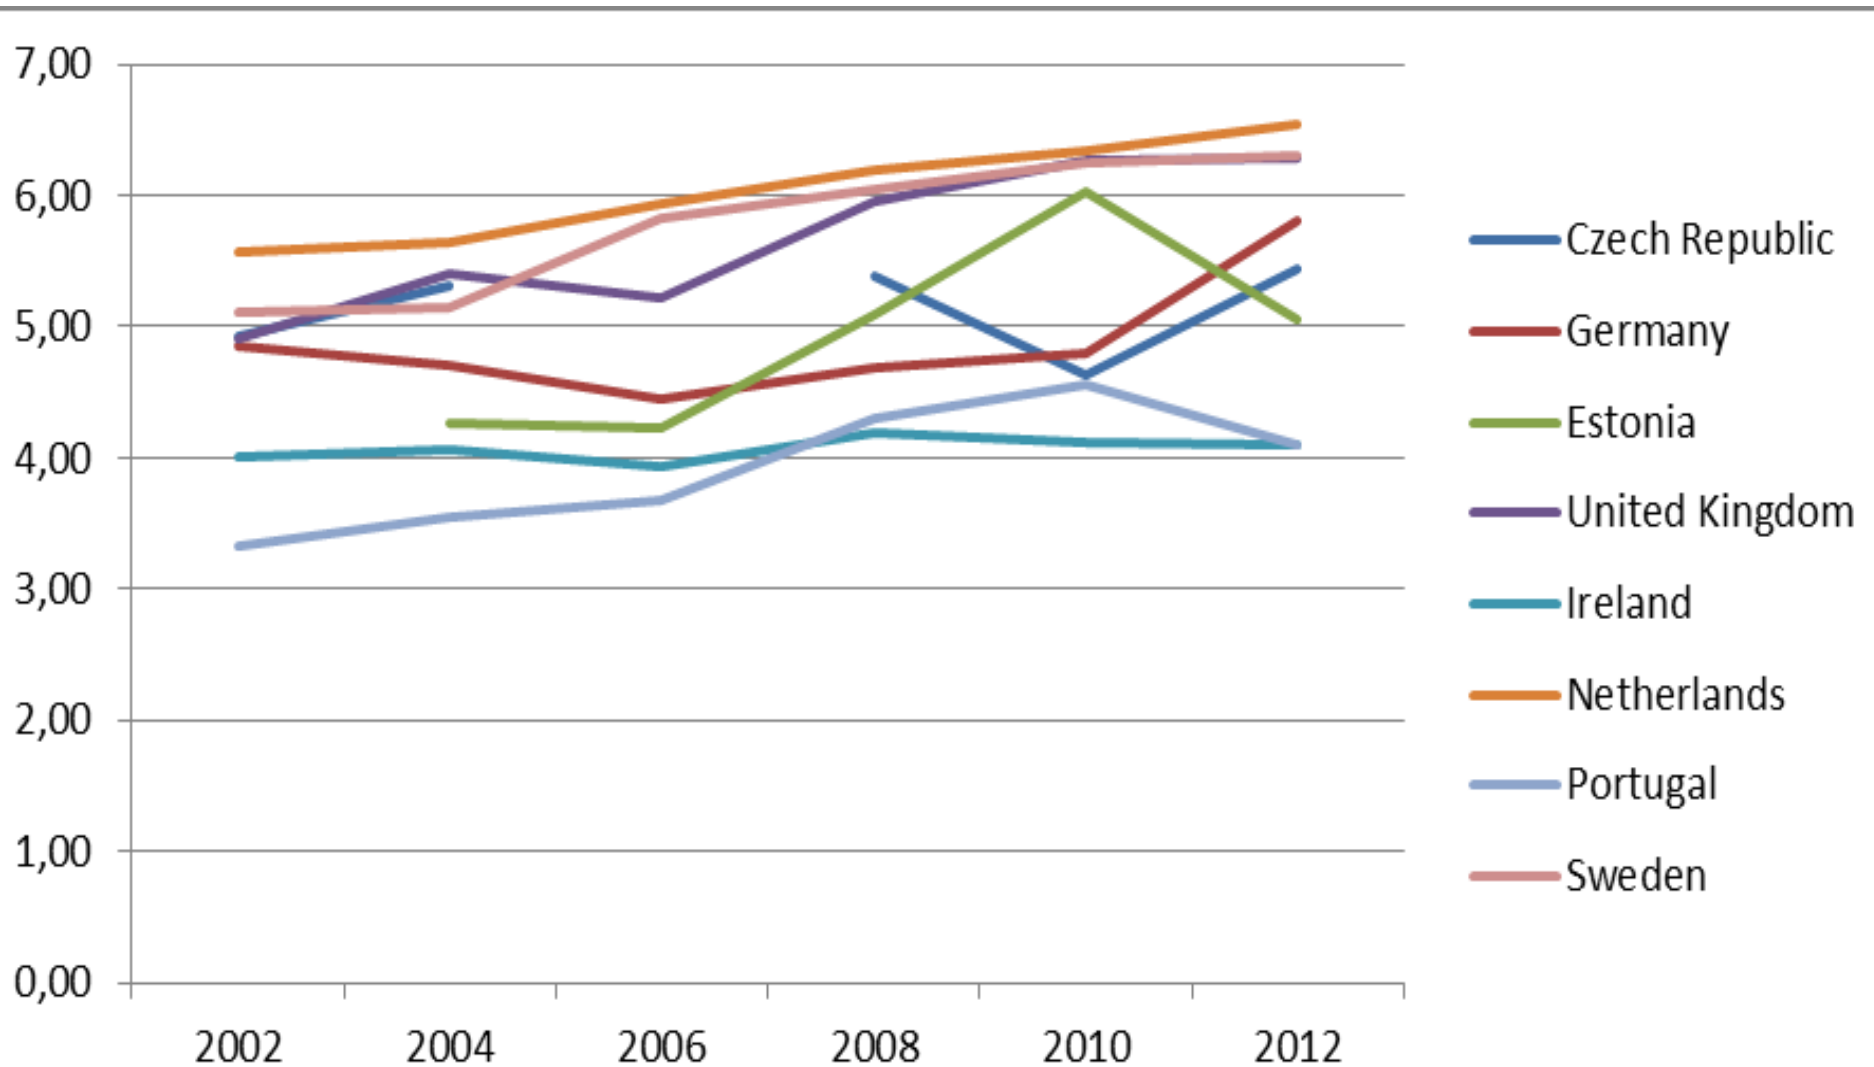

Out of Pocket Expenditure as % of Total Health Expenditure (WHO)

Evaluation of the overall the state of health services?

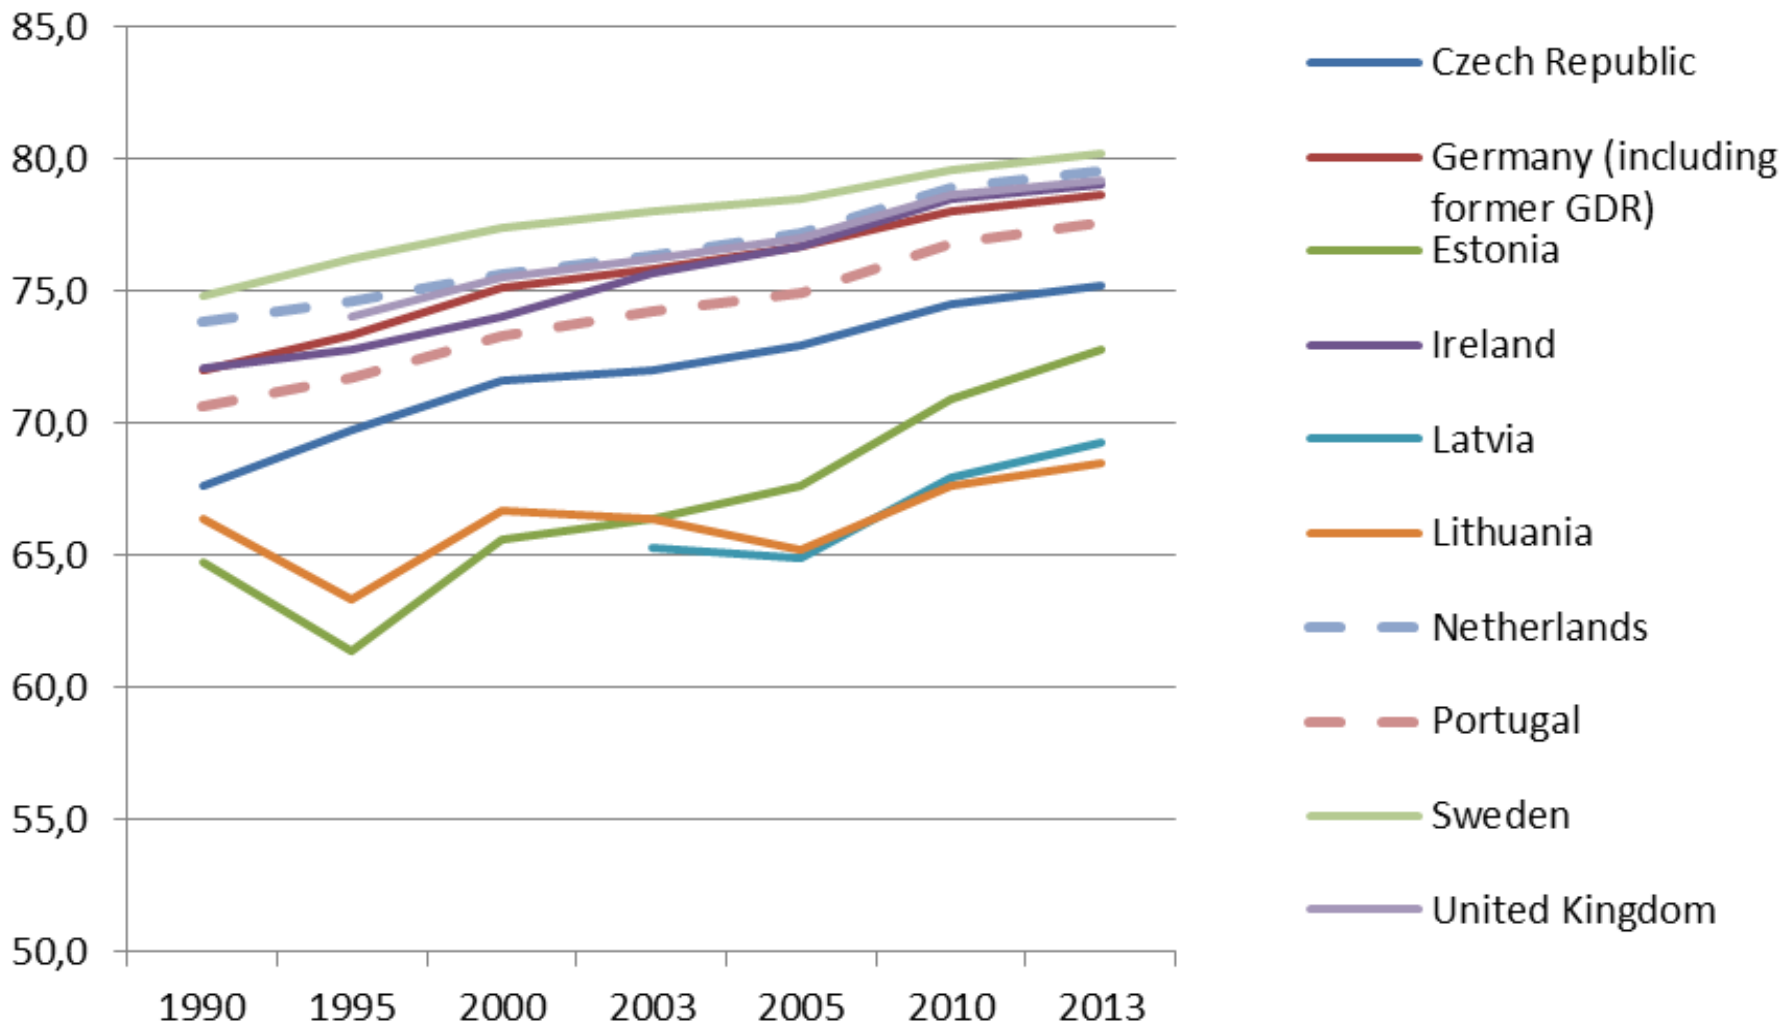

(0 Extremely bad – 10 Extremely good, Data source ESS)

System in Estonia

- Cheap and good
- The long-term financial sustainability
- How to improve integration between health and social welfare systems in terms of financing
- Fragmentation of responsibilities is arising from the financing mechanism of health institutions
- The declining satisfaction of population with health care services, increasing problem with long waiting times.
- Dental care

Rise of life expectancy for men
