

AGENDA

STAKEHOLDER PANEL DISCUSSION of the

BONUS symposium on 'Science delivery of sustainable use of the Baltic Sea living resources

Tallinn University Conference Center, Narva Rd. 29, Tallinn, Estonia

19. October 2017

9:00-9:45 Keynote presentation by Jason Link (United States)

9:45-10:45 Main challenges of integrating multiple interests in sustainable ecosystem management (moderated by Georg Martin, University of Tartu)

- ✓ Who are the main players and what are the possible conflicting interests?
- ✓ Do we know enough about marine ecosystem structure and functioning to make informed/wise decisions?
- ✓ Is international cooperation sufficiently active and efficient to address directives and policies?
- ✓ How do bioengineering, aquaculture, and new marine installations fit into the context?

10:45-11:00 Coffee break

11:00-12:00 Main challenges of sustainable balanced management in fisheries

(moderated by Kaire Märtin, Ministry of Environment of Estonia)

- ✓ From single to multispecies management: mismatch between the need and reality
- ✓ Spatial management of marine living resources
- ✓ Making the ecosystem-based approach operational: impact on food webs, carbon sequestration, habitats and genetic diversity
- ✓ Future challenges of the Baltic fisheries management under global change

12:00-13:00 Main challenges for matching research and policy/management needs

(moderated by Liina Eek, Estonian Research Council)

- ✓ How to ensure knowledge transfer from science to management and policy decisions?
- ✓ How to overcome the mismatch between the policy/management needs and research funding?
- ✓ How to achieve an ecosystem approach in marine research?

13:00-14:00 Lunch
