MAGNETIC GROUP

Operates in the aviation business and is the master brand under which a host of sub-brands all live – each one sharing the same values but offering unique and complementary products and services. Magnetic Group is a holding company and does not itself offer any products or services.

Although the airline maintenance business is highly standardized, our approach is unique. With our range of brands, each with different services, Magnetic group has a holistic care offering built around effectiveness, trust, passion, enthusiasm, and an exceptional drive to go the extra mile.

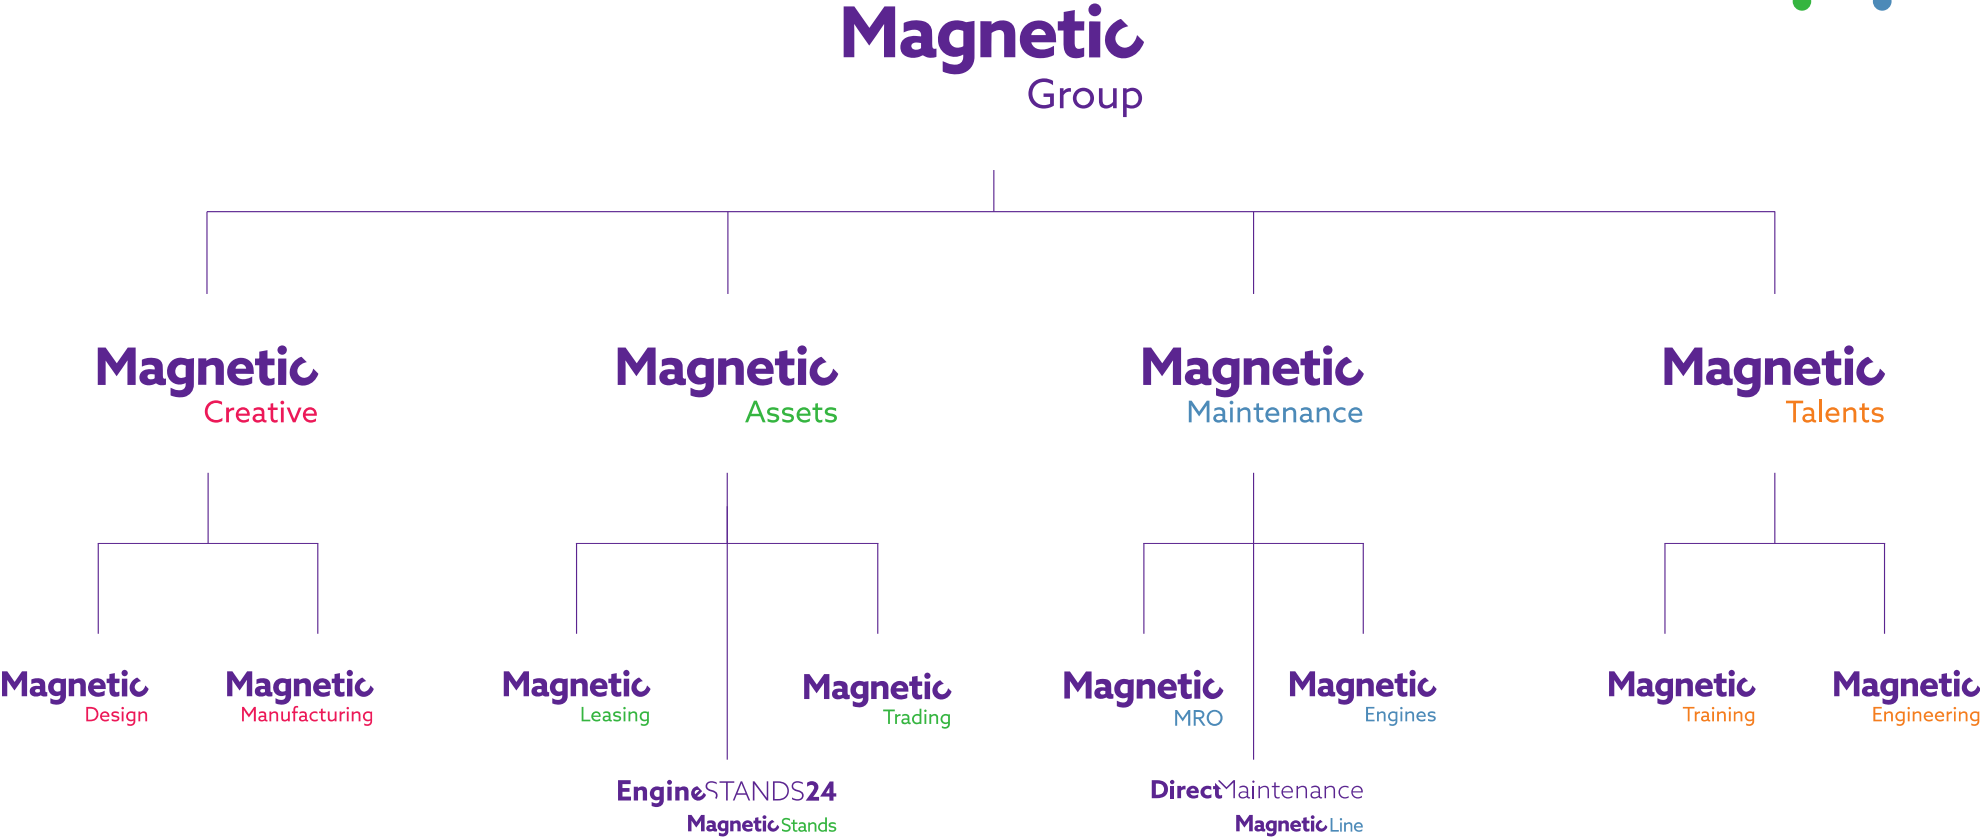

This allows us to provide exciting solutions and streamline processes for our clients, enabling them to focus on their own business.

TESTIMONIALS

"For me as a technical representative, it is always gratifying to work with such a highly motivated and professional team like Magnetic MRO. Even in difficult times, we as Austrian Airlines can rely on having a trustworthy and strong partner on our side. Our high standards and expectations have always been achieved or even exceeded over the years, so I look forward to our further cooperation with joy and confidence."

"A familiar and great place with excellent customer service, highly professional with dedicated staff that will go above and beyond. Simply a great partner to rely on."

"A customer-oriented team, professional and always willing to help the customer. Completely committed to achieving the TAT goal."

"Magnetic MRO's commitment and dedication to long-term partnership have been greatly appreciated by Finnair. Their attention to detail, adherence to high-quality standards, professional communication and flexibility have contributed to the successful completion of beforementioned projects. Magnetic MRO is considered a reliable and trustworthy partner to Finnair."

"It was a true pleasure working with Magnetic Engines team. The professionalism and patience demonstrated was second to none and greatly appreciated. We at Kellstrom look forward in building a stronger relationship on upcoming future projects."
